5.1 Certified Status at this Time

It is very important for the client to understand that until they receive written confirmation of their MSPO Supply Chain certification registration from the TCI certifier (see 6.2c below) and its expiry date that they are not certified and cannot make any claims concerning certification.

5.2 Actions that a Need to be Completed Prior before Certification can Proceed

- a) If any non-compliance was noted, then a certification decision is not possible until the client has taken steps to close out the non-compliances noted in the certification checklist. See also 6 below.
- b) If full compliance was noted during the audit, the next step is for the checklist and public summary plus any associated documentation, to be sent to the TCI MSPO SCCS Certifier, by the lead auditor. The certifier will review the documents and may refer back to either the lead auditor or to the client for further information or clarification.
- c) Once the certifier is satisfied, a positive certification will be made and a certificate is awarded and sent to the client. The MSPO SCCS is also notified within 14 days of the issuing of the certificate.

5.3 Audit Findings
The findings of the MSPO SCCS checklist and the certification report were presented to the client.

5.4 Details of Any Further Information Supplied by the Client at this Stage
No further information was given.

5.5 Confidentiality
TCI auditors will not discuss or reveal any of the confidential information seen during the audit to any third party. Any public summary of the main assessment will be approved by the client prior to publication.

5.6 Annual Audit
The certificate is valid for 5 years and the certificate holder needs to be audited annually

5.7 Non-Compliance
The client is made aware that:

- All non-compliance observed during an audit shall be classified as ‘major’ since all requirements for Supply Chain Certification have to be met before granting certification.
- Applicable to main assessment audits, all non-compliances shall be addressed satisfactorily by the client before certification may be granted. If non-compliances are not addressed within three (3) months of the audit, a full re-audit shall be required.
- TCI shall assess the effectiveness of the corrective and/or preventive actions taken before closing out the non-compliance.
- Non-compliances that are raised after the main certification are serious (i.e. must be considered as a major) and the integrity of the MSPO Supply Chain Certification is at risk.
- For subsequent annual assessment audits, a maximum of one month is to be given to the certified client to satisfactorily address the non-compliance. Should the non-compliance not be addressed within the one month maximum timeframe, a suspension or withdrawal of the certificate and a full re-audit may be necessary.
- Where objective evidence indicates that there has been a demonstrable breakdown in the supply chain caused by the certified client’s actions or inactions, and that oil palm products have been or are about to be shipped which are falsely identified as MSPO certified product then immediate action will be taken by TCI, and the MSPO Supply Chain certification should be suspended until such time that it has been addressed.
- If certification is suspended or removed, for example on the basis of lack of effective corrective actions, the client shall inform their supply chain customers immediately. If certification is granted subsequently then this can be communicated to the customer group.
