PART 2: SUMMARY OF THE REPORT AND SCOPE OF THE AUDIT

2.1 MSPO SCCS Summary Report

Summary report of the audit including a brief description of the scope of certification and supply chain model(s) used

The mill processes Fresh Fruit Bunches (FFB) into Crude Palm Oil (CPO) and Palm Kernel (PK) with a processing capacity of 54 MT per hour. The production is exclusively for local export. According to the mill layout plan, three CPO storage tanks and two PK storage units were identified. The CPO storage capacity includes two tanks of 2,000 MT each (one in use and one as a reserve) and one 500 MT tank (reserve). The PK storage capacity consists of one units, one with 150 MT. No external storage is involved. The management maintains a well-organized list of FFB suppliers and buyers of CPO and PK. As confirmed during the audit, the mill is not using the MSPO logo for any purpose.

Deliveries of CPO to buyers are handled by FGV Transport Sdn Bhd. Verified by management, the MSPO logo is not used on or off-product. The complaint records are well-maintained, and no complaints related to product quality were reported in the previous year. The mill follows a policy that requires all MSPO SCCS-related documents to be kept for a minimum of three years, verified through last year's procedures, management documents, and supplier records. The traceability procedure and the MSPO Trace system are available and well implemented. Incoming FFB is accompanied by a delivery note and grading chit before entry to the mill, and the weighbridge ticket contains all the required details.

Through the MSPO Trace system, it was verified that the mill declared both certified and non-certified FFB suppliers. The certified FFB supply comes solely from the FGVPM Group, while all other suppliers are declared as non-certified.

The Mass Balance records are maintained using the Integrated Palm Mills System (IPMS), covering transactions from January 2024 to the audit date. Daily transactions and production of CPO and PK are recorded in the Mill Daily Figure. The mass balance system follows a continuous accounting approach. It was verified that certified MSPO product delivery transactions were conducted in the previous audit year.

In this recertification audit, no non-conformities were raised. The MSPO SCCS system is functioning effectively, and monthly declarations are submitted via MSPO Trace. As there were no significant issues identified during the audit, the Lead Auditor is satisfied and recommends the recertification of the MSPO SCCS certification.
