PART 2: SUMMARY OF THE REPORT AND SCOPE OF THE AUDIT

2.1 MSPO SCCS Summary Report

Summary report of the audit including a brief description of the scope of certification and supply chain model(s) used

The mill processes Fresh Fruit Bunches (FFB) into Crude Palm Oil (CPO) and Palm Kernel (PK) with a processing capacity of 54 MT per hour. The production is exclusively for local export. According to the mill layout plan, three CPO storage tanks and one PK storage units were identified. The CPO storage capacity includes three tanks of 2,000 MT each (one in use and two as a reserve). The PK storage capacity consists of one unit, one with 500 MT. No external storage is involved. The management maintains a well-organized list of FFB suppliers and buyers of CPO and PK. As confirmed during the audit, the mill is not using the MSPO logo for any purpose.

Deliveries of CPO to buyers are handled by FGV Transport Sdn Bhd. Verified by management, the MSPO logo is not used on or off-product. The complaint records are well-maintained, and no complaints related to product quality were reported in the previous year. The mill follows a policy that requires all MSPO SCCS-related documents to be kept for a minimum of three years, verified through last year's procedures, management documents, and supplier records. The traceability procedure and the MSPO Trace system are available and well implemented. Incoming FFB is accompanied by a delivery note and grading chit before entry to the mill, and the weighbridge ticket contains all the required details.

Through the MSPO Trace system, it was verified that the mill declared both certified and non-certified BTS suppliers. There is no transaction of delivery certified sustainable product yet for previous audit year. The incoming sustainable FFB is coming from 1 estate which is FGVAS Jengka 24/25 and the non-certified FFB is coming from external suppliers.

The Mass Balance records are maintained using the Integrated Palm Mills System (IPMS), covering transactions from January 2024 to the audit date. Daily transactions and production of CPO and PK are recorded in the Mill Daily Figure. The mass balance system follows a continuous accounting approach. It was verified that no certified MSPO product delivery transactions were conducted during the previous audit year.

In this recertification audit, no non-conformities were raised. The MSPO SCCS system is functioning effectively, and monthly declarations are submitted via MSPO Trace. As there were no significant issues identified during the audit, the Lead Auditor is satisfied and recommends the recertification of the MSPO SCCS certification.

4.5 Summary of previous certification assessments and conclusion, with recommendations or non-conformances

(Not applicable for main assessment reports)

Processing of Fresh Fruit Bunch into Sustainable CPO and PK with mill's processing capacity of 60mt per hour. The production of CPO and PK is only for local export. Through site inspection, 3 storages for CPO were sighted and 2 store for PK. Storage capacity for CPO is 2000mt EACH and PK is 150mt each. There was no external storage involved. The list of FFB supplier and buyer of CPO and PK was well maintained by the management. Verified during the audit with management, the mill is not using MSPO logo for any purposes.

The management has developed SOP of MSPO SCCS procedure for FGVPI KKS JENGKA 21, effective on 7th Jan 2021. The management has appointed Mr. Nor Akmal bin Md Noar as responsible person to monitor MSPO SCCS requirement.

Verified from the MSPO Trace system, the mill has declared their certified and non-certified FFB's supplier together with their potential buyers of CPO and PK. There is no transaction of delivery certified sustainable product yet for previous audit year. The incoming sustainable FFB is coming from 1 estate which is FGVAS Jengka 24/25 and the non-certified FFB is coming from external suppliers.

The Mass Balance record is maintained by the weighbridge clerk and IPMS System (Integrated Palm Mills System). The incoming transaction and production of CPO and PK is recorded daily in the MPR System. The mass balance is using Continuous Accounting System.

The record keeping period stated all the document related to MSPO SCCS should be kept for minimum 3 years. The verification is done through the last year procedure, management documents and supplier documents. The procedure of traceability is implemented by the mill. The incoming FFB provided together with delivery note and grading chit before allowed to enter to mill. The weighbridge ticket is provided with details information required has been stated.

From the surveillance audit, there is no non-conformity raised. The system of MSPO SCCS is in place. There is no transaction of certified product yet. The monthly declaration is submitted every month in MSPO Trace.
