2.1 MSPO SCCS Summary Report

Summary report of the audit including a brief description of the scope of certification and supply chain model(s) used

The mill processes Fresh Fruit Bunches into sustainable CPO and PK with a capacity of 45 mt/hour. Site inspection confirmed the presence of three CPO storage facilities (capacity 4,100 mt) and one PK storage facility (capacity 650 mt), with no external storage used. Management maintains detailed lists of FFB suppliers and CPO/PK buyers, and the MSPO logo is not used for any purpose.

An SOP for MSPO SCCS procedures was developed and became effective on January 7, 2021, with Mr. Amirul Aqlan Bin Hamzah appointed to monitor MSPO SCCS requirements.

The MSPO Trace system verification shows that the mill has declared both certified and non-certified FFB suppliers, along with CPO/PK buyers. No transactions of certified sustainable products were recorded in the previous audit year. The received sustainable FFB was transferred to non-MSPO status.

Mass Balance records are accurately maintained, with daily transactions and CPO/PK production documented in the system.

Complaint records are well-maintained, with no quality-related complaints in the past year. MSPO SCCS-related documents are kept for a minimum of 3 years, with verification based on last year's procedures, management documents, and supplier records. Traceability procedures are enforced, requiring FFB to have a delivery note and grading chit before entry, with weighbridge tickets containing detailed information.

No non-conformities were identified during the audit, confirming effective implementation of the MSPO SCCS system. Monthly declarations are consistently submitted via MSPO Trace.
