PART 2: SUMMARY OF THE REPORT AND SCOPE OF THE AUDIT

2.1 MSPO SCCS Summary Report

Summary report of the audit including a brief description of the scope of certification and supply chain model(s) used

Processing of Fresh Fruit Bunches (FFB) into Sustainable Crude Palm Oil (CPO) and Palm Kernel (PK) operates at 60 mt/hour. CPO and PK are produced solely for local export. Site inspection confirmed four CPO storage units (capacity: 7200 mt) and one PK storage unit (capacity: 1000 mt). No external storage is used. Management maintains a list of FFB suppliers and CPO/PK buyers. The mill does not use the MSPO logo.

The MSPO SCCS procedure for FGVPI KKS Hamparan Badai, effective 7th January 2021, appoints Nurdin Jainuddin and other MSPO SCCS committee members to monitor compliance.

The MSPO Trace system lists both certified and non-certified FFB suppliers and potential buyers of CPO and PK. No certified sustainable product transactions occurred in the previous audit year. Sustainable FFB sources include FGVPM Sahabat 22, 23, 24, and 25.

Mass Balance records, maintained by the weighbridge clerk and the IPM System, track daily FFB intake and CPO/PK production using a continuous inventory period.

All MSPO SCCS documents are retained for at least three years. Verification covered past procedures, management documents, and supplier records. Traceability is ensured through delivery notes and grading chits for incoming FFB, recorded in weighbridge tickets.

No non-conformities were raised during the audit. The MSPO SCCS system is functional, though no certified product transactions have occurred. Monthly declarations are submitted in MSPO Trace.
